

Industrial Mechanic / Mechatronics Technician (m/f/d)

Location: Berg/Pfalz

Berger Group is a leading global specialist in the packaging industry. We develop, produce and market product solutions for applications in the chemical, petrochemical, pharmaceutical and food industry.

In addition to production facilities in Europe (Germany, France, England, Spain, Italy), we also produce at two plants in Asia and three plants in the USA. More than 4,000 different types of clamping rings are produced for a wide variety of applications using highly automated industrial processes.

As the market leader in Europe and North America, our products and services enjoy an excellent reputation. Due to the medium-sized company orientation and our corporate culture, we distinguish ourselves through short decision-making processes and a high level of freedom in your own area of responsibility.

Interested? Please send your comprehensive application (covering letter, CV, certificates) either by email to karriere@berger.global
